Your dosage

FOSTER® NEXThaler® 200/6

4 inhalations per day:

in the morning:
2 inhalations

in the evening:
2 inhalations

How to apply the FOSTER® NEXThaler® 200/6

1

120

Before application commences, check the dose counter. A value of between "1" and "120" indicates that there are still further dosages in the NEXThaler®.

Make sure that the protective cap is closed completely before you use the inhaler.

Hold the inhaler firmly in an upright position. Now open the protective cap to the fullest extent. Exhale as deeply as possible. While doing so, do not breathe into the inhaler.

2

Guide the inhaler to your mouth and enclose the mouthpiece firmly with your lips. Make sure that you do not block the air inlet while holding the inhaler. Inhale with a quick and deep breath. You will hear a clicking sound. Do not allow this to irritate you and carry on inhaling deeply.

Then remove the inhaler from your mouth and hold your breath for 5 to 10 seconds or as long as it's comfortable for you.

Exhale slowly. Do not breathe into the inhaler.

3

119

Return the inhaler to its upright position and close the protective cap completely.

Check whether the dose counter has gone down by one. If this is not the case, please consult your doctor for an assessment of the inhalation technique and/or ask your chemist to examine the condition of the device.
